Albert Puccini & Ben Galvin

Scope of Work

- 3rd party review and certification of belt storage tower foundation
- 3rd party review and certification of conveyor foundations
- Optimisation of belt storage tower foundation
- 3rd party review and certification of tunnel ventilators support frames
- 3rd party review and certification of TBM temporary support
- Pads stability check

Project Challenges

- Quick response time required
- Information required from third parties
- No site inspections allowed due to COVID-19 restrictions

How we managed this

- Dedicated engineer on the project
- Proactive approach and good communication with Future Generation contracting site team
- Optimised design to meet conservative design assumptions

Value Engineering

- Timely response with McDowall Affleck's dedicated engineer to avoid site delays
- Provision of multiple concept options
- Flexible design to include materials available on site and contractor's preferred installation method
